

CHART OF THE ARCTIC OCEAN

Compiled from the latest information
1885.

SOUNDINGS IN FATHOMS
HEIGHTS IN FEET.

C for Clay, G for Gavel, M for Mud, O for Ore, S for Sand, St for Stone.

EXPLANATION

This chart is constructed on the ordinary conical projection. The meridians and parallels are omitted and the lettering is placed horizontally in order to give a clearer idea of the shape and size of the Arctic Ocean and the relative positions of the adjacent coasts.
The longitude of a point is found by drawing a line from the pole, through it to the longitude circle.
The latitude of a point is found by laying off its distance from the pole along the latitude scales.

Nautical Miles
